

CONTRACTOR PUMP SPRAYER

KEY FEATURES

- Working pressure of 55 psi
- Pressure relief valve
- 'Air inlet' valve for charging with a compressor
- Heavy duty braided adjustable carry strap
- Working pressure gauge displaying KPA/PSI level
- High pressure braided hose
- Stainless steel crimped hose fixings
- Adjustable stainless steel nozzle

Specifically for HVACR contractors. An all stainless steel pump, with airline grade hose and trigger, it is designed to meet the high standards contractors need, with robust construction that is built to last.
