Technical Data Sheet Condensate Hose

DESCRIPTION

Gel-clear '25 year' hose is a heavy duty, 1/2" PVC hose with steel wire reinforcing for condensate pumps. Unlike conventional braided hose, the steel wire helix makes it impossible for the hose to kink, flatten or compress in any way to restrict the flow of the pump in normal use. The plastic hose does not degrade over the lifetime use.

Ideal for cabinet dairy pumps beneath cabinets, where push and pull can kink the hose, or above ceilings, where bends and turns in direction can cause pinch points liable to kinks.

Hose can be tightly zip tied and will not crush. 2.8mm thick walls with steel wire spiral helix reinforcing.

Failsafe discharge hose, for any type of condensate pump, assuring integrity of the installation, and a protected pump.

The hose comes with a no quibble 25 year warranty.

KEY FEATURES

- Size – 1/4" or 1/2"
- ID mm – 9mm or 12mm
- OD mm – 17.6mm
- Weight per metre – 180g
- Roll length – 20 metres
- Weight per roll – 3.6kg
